1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashima et al (6,125,782 cited on PTO-1449) in view of DeLine et al.

Takashima et al teaches the claimed vehicle with a frame, straddle-type seat, and global positioning system having an antenna (80, 81, and 83-88).

DeLine et al teaches a vehicle with a global positioning system (column 31, lines 10-37) having an antenna (50), using a cellular radio transceiver (Figure 16), having a weather broadcast receiver (column 40, line 65 to column 41, line 22), and being connected to the INTERNET (Figure 16).

To provide additional information for the rider of the vehicle of Takashima et al, obviously the vehicle of Takashima et al can have the claimed transceiver, weather broadcast receiver, and INTERNET connection, as taught by DeLine et al.
